Professional awards

- National higher education scholarship 2023

I consider myself an enthusiastic programmer with an interest in both imperative and functional programming paradigms. I like being around people and working in a team. I am open to absorb and acquire new knowledge and skills.

I graduated in 2021 with a 4.8 GPA and after half a year I completed my A-levels in Computer Science with distinction. After that I obtained my English B2 exam. In the meantime I studied Software Development and Testing. I started my university studies in 2022 at ELTE-IK. I was awarded a National Scholarship for Higher Education in 2023 for my academic achievements in the first two semesters. From the second semester onwards, I have been in various demonstrator roles.

I would like to work full-time in the summer after my exams and part-time from the start of the university semester. I look forward to being part of an inclusive, large community and learning more new and interesting things.

Work experience

Student Tutor 2024 Feb - 2024 May

Eötvös Loránd University, Programozáselmélet és Szoftvertechnológia Department, Budapest

Teaching of object-oriented programming in the semester 2023/24/2.

Student Tutor 2023 Feb - 2023 Dec

Eötvös Loránd University, Programozási nyelvek és fordítóprogramok department, Budapest

Background work in functional programming in semester 2022/23/2 and teaching in semester 2023/24/1.

Studies and qualifications

BSc 2022 Sep - 2025 Jul

Eötvös Loránd University, Budapest

Faculty of Informatics, Bachelor of Computer Science in Computer Programming

Technician qualification 2021 Sep - 2023 May

BGéSZC Szily Kálmán Technical School and College, Budapest

Software developer and tester
